The manufacturing industries of Utica employed

persons in 1890; 6,710

in 1890. The wages paid in these industries in 1890 amounted to \$1,917,657

In 1890 they were \$3,335,130

It is evident that Utica profited by Protection.

—New York Press.

Just at present the transatlantic steamship companies labor under the delusion that their powers and interests are superior to those of the United States of America, but they will get rid of that fallacious notion in good time.

Many of the European countries are preparing to send their views on immigration to the Government of the United States. It is not too much to say that their views on immigration are rather more welcome just now than some of the immigration itself.

Some of the Free-trade brethren are amazed at the fact that the iron industries of Pennsylvania and Ohio are just now enjoying a highly prosperous interval. The surprise caused by this condition of affairs is confined wholly to Free-trade circles. Sensible observers know that the prosperity referred to is due to Protection and to the dreadful McKinley law.

The situation with respect to the Tariff issue in Congress is just this: The Free-traders would like to smash the McKinley law if they dared, but they are afraid to undertake so heavy a task. They will therefore consent to write themselves down as cowards and dodgers rather than fulfill the pledges of their party by voting for Free-trade. It is the same old Democratic party.

The Commissioner of Internal Revenue reminds us that we are a tobacco loving people. His report shows that last year there were manufactured in this country 4,496,633 cigars, 3,210,402,937 cigarettes, \$53,962,021 pounds of tobacco and 11,154,251 pounds of snuff. That means that if every living person received his or her quota of the aggregate supply it would amount to 70 cigars, 50 cigarettes, 4 pounds of tobacco and 3 ounces of snuff.

It is now announced that the preliminary surveys for the proposed railroad connecting this country with Central and South America reveal no insurmountable obstacles in the way of the undertaking. Difficult engineering problems must be solved in carrying the route through the Andes, but they are no greater than those which confronted the projectors of the great transcontinental roads of North America. Americans want this overland route opened to our sister republics because it will draw us into closer commercial relations and cement our friendship. It will be a long stride forward on the road marked out with reciprocity, and will bring incalculable benefits to the whole Western Hemisphere.

Report says that Grover Cleveland has bought an English harness for his fine span, upon which rumor The Commercial Advertiser says: "The leather of which Mr. Cleveland's English girths are made was in all probability produced in the United States. Any stable boy could have told him where he could have had this leather made right here in New York into as good harness as his leather importation. Anyhow, it is always a good idea to encourage our home industries where it can be done without violating the Constitution." And THE LEDGER could have told Uncle Grover that he could have gotten his harness made right here in Maysville, just as good as anywhere else in the world—and as cheaply as the imported article.

THE MISTLETOE MISCRIPE.

She stood beneath the chandelier, With eyes and cheeks aglow—

He gazed upon her like a king, And pressed upon her lips a kiss,

And blessed that mistletoe.

It happened that her pace in— Oh, ruin, wreck and woe!

His foot was big and well applied, And soon the young man stood outside

And cursed that mistletoe.

NOW IS YOUR CHANCE.

TRY YOUR HAND AT GUESSING—GOLD GIVEN AWAY.

Who Will be the Next Marshal, Collector and Treasurer and Assessor? The Ledger's Scheme for Your Amusement.

In order that the readers of THE LEADER may have some diversion with which to occupy their minds, and diverting at the same time to attract public attention to our new paper, we have concluded to propose a guessing contest, and hope that our subscribers and readers may become interested in our effort to afford amusement.

Public interest during the next few weeks will be more centralized in the coming city election than in any other local matter, and we have, therefore, selected that as the head of our guessing contest.

We have selected as the races to be guessed upon those three: City Marshal, Collector and Treasurer and Assessor, for the reason that they seem to be the most complicated, and more interest will probably be taken in each office, and also more interest in each office for each office. The outcome in these contests will be harder to anticipate, and, therefore, our scheme will prove the most interesting.

For the office of City Marshal there are six candidates announced, as follows: M. E. McKeen, R. W. Fitzgerald, John W. Alexander, John V. Day, James Jackson and W. B. Dawson.

For Collector and Treasurer there are two contestants: James W. Fitzgerald and Horatio Picklin.

Also three for Assessor: Charles D. Shepard, Fred W. Bauer and John Walsh. There are 1,000 votes registered.

We propose to give prizes \$17.50 in gold, as follows:

The first prize of \$10 in gold will be given to the first person who makes the winner in each contest and also to the person nearest to the exact number of votes received by each.

A second prize of \$5 in gold will be given to the person making the next best guess.

A third prize of \$3 in gold will be given to the person making the third best guess.

In making guesses the following rules must be observed:

First—All guesses must be made out on the following form, and must be forwarded by mail or hand or handed in person to this office.

Second—Guesses must be made in each of the three contests in order to receive consideration.

Third—Your name and Postoffice address must be signed at the bottom of your guess.

In awarding the second and third prizes no account of the time they are received will be taken into consideration. These prizes will be given to those entitled to them by reason of their guesses, no matter at what time said guesses are received.

All guesses must be made so that they will reach this office by 5 o'clock p. m. on Saturday, December 31, 1892.

Any one, man, woman or child, can guess. Fill out this blank as indicated and cut it out and forward by mail to THE LEADER, Louisville, Ky., or hand in person to this office.

FOSTER'S PLAN.

The Secretary's Scheme Unsettled by the President.

Mr. Harrison Wants No Bonds Issued During His Administration.

Wall Street men were in favor of the scheme and the speculative contingent in high finance was in favor of the President's cooperation.

New York, Dec. 30.—The Times states that Secretary of the Treasury Foster's trip to this city was not on private business, as was given out officially, but was for the purpose of consulting with Wall street magnates on the proposition to relapse the money market and check the export of gold by having the government issue from \$50,000,000 to \$100,000,000 of bonds. The Wall street men were in favor of the scheme, and the speculative contingent were in high feather. The president's co-operation had been counted on as sure, but this confidence was suddenly discovered to be delusive. The president not only refused to approve the deal, but he went further, and expressed himself with unusual force and decided that he could see no use for long bonds, and, what was more, he did not propose that any should be issued while he was president.

According to Wall street reports, Secretary Foster, before he suddenly left town to go west, is credited with having received a dispatch from Washington couched in pretty stiff language and running substantially as follows: "I want no new bonds issued during my administration."

The Times says that Mr. Foster met the Wall street men at an club-house on Fifth avenue, and a private conference was held. Some of the most notable men in the street are said to have been present, and an agreement was formed on the financial part of the government. The action of President Harrison upset the plan entirely, and there is now no prospect of an issue of bonds to stop the stringency in the money market.

NEGROES LYNNED.

These Cases Were the Result of a Stronger and Attempt to Murder a Negro Operator.

NEW ORLEANS, Dec. 30.—On Christmas day two Negroes were lynched in the store of A. Silver, at Luling, in St. Charles parish, a short distance above New Orleans, to buy something. They did not make a purchase, and the owner started out. Emmanuel Bastei, a white man who was clerking in the store, proceeded to close up his place and was about to put the door when he was knocked on the door. He partially opened it again, and was confronted by the two Negroes, one of whom had a pistol in his hand and fired. Bastei fell with a shot through the heart. He was not killed instantly, and when he fell he was shot again, and the Negroes both fired. Tuesday night the same two Negroes made a desperate attempt to murder the telegraph operator at Luling, four of them, and with the aid of their first crime. They fired twice at him through the window of his office, but did not succeed in their attempt to kill him. He escaped by the aid of his friends, succeeded in capturing the two Negroes and two others. Lewis Fox and Albert Jones, who were the men who had killed Bastei. They were taken to the parish jail, and Wednesday night a gang of masked white men, armed with shotguns, entered the jail and killed the two Negroes and the keeper and hanged them to a beam in a shed near the court-house.
